Bangalore, India

Software Development Engineer with 7 years of experience building cloud-native, scalable, high-throughput microservices using Java, Spring Boot, Kafka, and Kubernetes, with hands-on expertise in GenAI/LLM integration.

EXPERIENCE - 7 Years

Walmart Global Tech , Bangalore— Software Engineer-III

MAY 2024- PRESENT

- Architected and owned **enterprise-scale, highly scalable distributed backend services** for large-scale catalog systems with strong guarantees on **reliability, concurrency, and fault tolerance**.
- Led a team of 3 engineers to deliver **Project ATOM end-to-end**, reducing item re-ingestion time by **~60%** and driving cross-team execution.
- Designed and implemented **cloud-native microservices architecture** with event-driven workflows using **Kafka and async processing**.
- Built and deployed **containerized applications on Kubernetes clusters**, enabling scalable and resilient service orchestration.
- Developed **Wally (AI Assistant)** using **ReAct-based agents**, integrating **Milvus vector DB, LLMs, and BigQuery via Cube.js** for intelligent data querying.
- Designed a **full RAG pipeline**, including semantic retrieval, LLM-based query translation, and evaluation framework using chain-of-thought reasoning.
- Implemented **API security best practices** (authentication, authorization, validation) ensuring compliance with enterprise governance standards.
- Started as a Full-Stack Engineer on the Supplier Onboarding project, building ReactJS-based frontend experiences and Java/Spring Boot backend services
- Optimized **cloud infrastructure costs (Azure)** via resource right-sizing and workload optimization, saving **$1000+/month**.
- Built **GenAI-driven automation pipelines**, reducing manual effort by **~40%** in item enrichment workflows.
- Improved API performance by **~30%** by resolving concurrency bottlenecks and optimizing request handling.
- Developed **CI/CD pipelines** and automated deployment workflows ensuring reliable releases.
- Built **observability and monitoring systems** using Prometheus, Grafana, and logging pipelines.
- Mentored engineers and contributed to **system design (HLD/LLD), architectural reviews, and production readiness**.

TECHNICAL SKILLS

❖ **Language**: Java, Python, C++, SQL

❖ **Backend & Distributed Systems**: Spring Boot, Microservices, REST APIs, SOAP API, FastAPI, Kafka, event-driven architectures, async processing, concurrency control

❖ **Cloud Platforms**: AWS (EC2, S3), Azure

❖ **Generative AI & LLMs**: LLMs (GPT, Claude), LangChain, RAG, Graph RAG, Agents, MCP, Vector Databases (FAISS, Milvus), Knowledge Graphs (Neo4j), Fine-tuning, Prompt Engineering

❖ **Databases & Storage**: PostgreSQL, MongoDB, Apache Cassandra, Oracle, Azure SQL, Azure Cosmos DB, DynamoDB, Redis.

❖ **Observability & Reliability**: Metrics, alerting dashboards, Prometheus, Grafana, Splunk, OpenObserve

❖ **Engineering Practices & Tools:** System Design (HLD/LLD), Data Structures & Algorithms,Agile/Scrum, Jira, Linux, IntelliJ IDEA, windsurf, cursor, CI/CD (Jenkins, GitHub Actions), Terraform (IaC), Linux, Docker, Kubernetes.

Amdocs Development Centre India LLP — Software Developer

Dec 2021- May 2024

- Designed and built **secure, scalable RESTful microservices** for a large-scale Order Management System.
- Improved service performance by **~20%** through request optimization and efficient processing pipelines.
- Diagnosed and resolved **complex production issues** across distributed environments ensuring high availability.
- Identified and fixed **critical authorization vulnerabilities**, preventing potential revenue leakage.
- Delivered **backward-compatible APIs**, automated test suites, and stable production deployments.

Tata Consultancy Services (TCS)— *Software Engineer*

June 2019 - Nov 2021

- Built a search-driven backend application leveraging AWS S3 and indexed data access patterns
- Developed automated testing frameworks using Selenium, TestNG, and Cucumber to improve release confidence.
- Gained foundational experience with cloud services, CI pipelines, and distributed application debugging

EDUCATION

B.Tech – Computer Science Engineering

AUG 2015 - JUNE 2019

Score: 77.40%

AWARDS

Excellence Award - umang-madeshia-excellence-a...

Bravo Award - umang-madeshia-bravo-aw...
